Amplify Zoom with Zoom Phone

Streamline your remote team's productivity by integrating Zoom Phone with your existing Zoom video chat license. With the powerful capabilities of Zoom Phone, you can take your virtual meetings and conference calls to the next level, ensuring seamless and professional communication.

Zoom Phone: Revolutionizing Business Communication

A Unified Communications Platform

Zoom Phone's cloud-based phone solution integrates with existing video conferencing platforms to provide a seamless unified communication platform for remote teams across the globe.

Powerful Call Management

Zoom Phone offers traditional phone features like call forwarding, voicemail, and call recording, as well as powerful call management features like call routing and automatic call distribution.

Innovative Visual Voicemail

Zoom Phone's visual voicemail feature transcribes voicemails and displays them as text, creating the ability to read and respond to messages quickly and easily.

Flexible Deployment Options

Zoom Phone can be deployed on-premises or in the cloud, providing flexible options to meet business needs.

Benefits of Zoom Phone

Increased Productivity

By integrating Zoom Phone with existing video chat licenses, teams can effectively streamline communication and simplify technology tools, resulting in increased productivity.

Easy to Use

Zoom Phone's intuitive interface makes it easy to use, even for those who are not tech-savvy.

Global Reach

Zoom Phone allows users to make and receive calls from anywhere in the world, making an easier connection for Global teams and clients regardless of location.

Zoom Phone for Virtual Meetings

Virtual Backgrounds

Zoom Phone allows users to add virtual backgrounds to video calls, granting the ability to modify surroundings and make meetings more engaging.

Screen Sharing

With Zoom Phone, users can share screens in real-time, making it easier to collaborate and share important information during meetings.

Virtual Whiteboard

Zoom Phone's virtual whiteboard feature allows users to collaborate and take notes in real-time during virtual meetings.

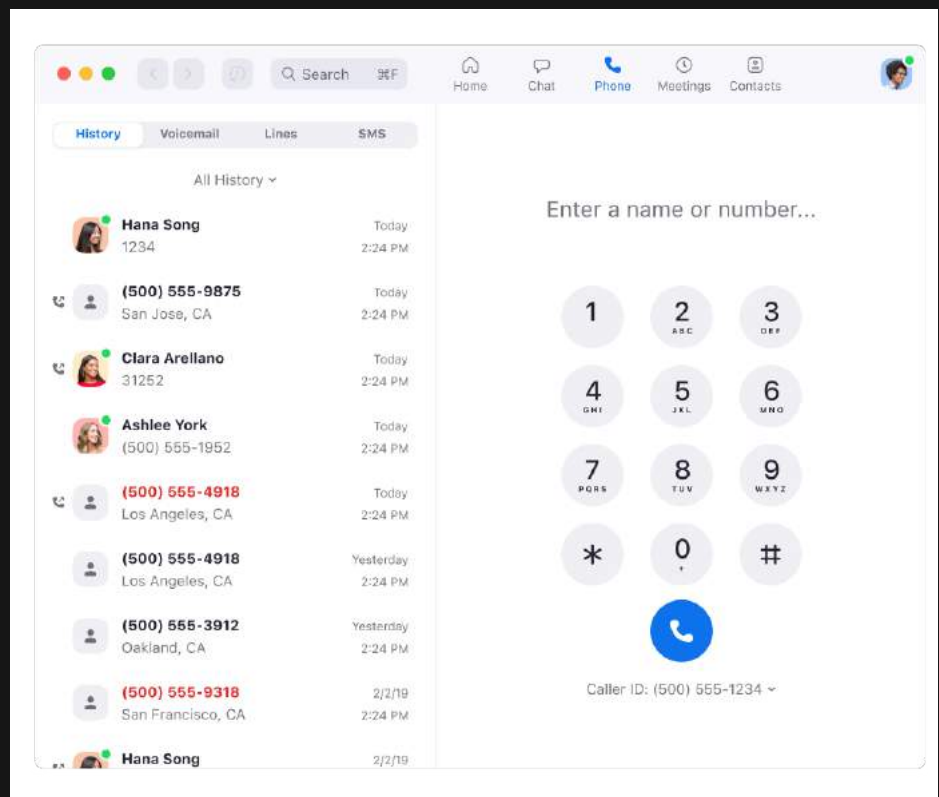

Zoom Phone for Conference Calls

Call Recording

Zoom Phone allows users to record calls, making it easier to refer back to the conversation and capture important details that may have been missed.

Automatic Call Distribution

Zoom Phone's automatic call distribution feature ensures that calls are directed to the appropriate team member or department, providing seamless customer support and reducing wait times.

Voicemail Transcription

Zoom Phone's visual voicemail feature transcribes voicemails and displays them as text, allowing users to easily read and respond to messages.

Call Routing

Zoom Phone's advanced call routing customizes call routing rules based on team needs and business requirements.

Streamlining Remote Team Productivity

Unified Platform

By integrating Zoom Phone with existing video chat licenses, businesses are able to provide their teams with a unified platform to simplify their communication and collaboration tools.

Flexibility

Zoom Phone's flexible deployment options allow teams to customize the solution based on business needs and scale as they grow.

Increased Efficiency

With Zoom Phone, teams can streamline their communication and technology tools, resulting in increased efficiency and productivity.

The Optimal Solution for Effective Communication

Integration is Key

By integrating Zoom Phone with existing video chat licenses, teams can streamline communication tools and simplify remote team's technology stack

Powerful Features

Zoom Phone's powerful call management features, virtual whiteboard, visual voicemail, helps you to stay connected with team and clients anywhere in the world.

Productivity Boost

By streamlining your communication and collaboration tools, teams can boost productivity, enhance their remote workforce, and ensure their team stays connected, no matter where they are located.
