HOSTED PBX AND UC ADVANTAGES

Scalable fully-managed flexible solution that grows as your business evolves

Reduce operating expenses with an all-inclusive service bundles

UC without complexity and capital expense of a new phone system

Avoid technology obsolescence – simply add features and services on-demand

Business continuity design for zero-outage communications

Flexible network options including 3rd-party MPLS and public Internet

Simple web-based management for user and admin control

UC-One collaboration, IM, video conferencing, Presence and desktop sharing

Mobility solution to extend service access beyond the desk.

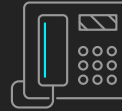

UNIFIED COMMUNICATIONS – UC-ONE

UC-One integrates with Microsoft Teams to deliver enterprise-grade video and telephony via an integrated softphone and a desk phone.

Microsoft-based UC functions can continue within Microsoft Teams - but UC-One enables calling any phone in the world seamlessly from within Office 365 apps, web pages and from within Microsoft Teams.

And, for your smartphone, UC-One's MobileLink client complements the Microsoft Teams mobile client by allowing you to make and receive calls to any phone on the public network with Shared Call Appearance.

UC-ONE
